

Welcome To Titan Fuel Tanks

Titan Fuel Tanks engineers and manufacturers ultra-durable, extra-capacity aftermarket fuel tanks made from advanced, military-grade, cross-linked polyethylene.

Titan offers a broad selection of replacement fuel tanks, designed to seamlessly integrate with and extend the fuel capacity and driving reach of a broad range of diesel truck models, including Ford, GMC, Chevrolet and Dodge vehicles. Titan serves the aftermarket fuel tank needs of the United States, Canada and Australia, and is recognized as an innovator in aftermarket fuel tank design.

Titan also manufactures transportable polyethylene refueling tanks, as well as a variety of polymer-based automotive parts and accessories.

Titan's engineering staff employs the latest technology in its design process including 3D computer aided design, finite element analysis (FEA), and 3D scanning.

Titan Fuel Tanks are Compliant with the Air Resources Board of the California Environmental Protection Agency(CARB).

Titan Presents Innovative Spare Tire Fuel System at 2013 SEMA Show

Titan Presents Innovative Spare Tire Fuel System at 2013 SEMA Show.

IDAHO FALLS, Idaho, (Oct. 22, 2013)—[Titan Fuel Tanks](#), a leading manufacturer of high-performance, engineered aftermarket fuel tanks, announced that it will introduce its new cross-linked polyethylene, Spare Tire Fuel System at the 2013 SEMA Show in Las Vegas, Nevada. The innovative 30-gallon tank and fuel transfer control unit have a patent pending and will be shown to the industry for the first time in Titan's booth 35111 in the Upper South Hall of the Las Vegas Convention Center.

NEW – TITAN Spare Tire Auxiliary Fuel System for GM, 2011-2014. (4010211)

TITAN's™ Spare Tire Auxiliary Fuel System

TITAN's™ Spare Tire Auxiliary Fuel System (STAFS™) puts an additional 30 gallons of fuel at your fingertips. In most cases this doubles the fuel capacity of American-made diesel pickup trucks made after 1999. This innovative system is designed to repurpose the space commonly used to stow a vehicle's spare tire. Its underbody location means that it has no impact on the truck bed's hauling space. In many cases where aftermarket custom wheels and tires are installed on a vehicle, they are not the same size as standard which means the original equipment spare cannot be used anyway.

For help with your TITAN Tank we need:

Truck: Make, year, model, mileage

Tank: Serial number (located on a sticker on the rear of the tank in most applications, for older tanks it is located on the driver's side on the outboard surface a foot from the rear of the tank.)
